## RESEARCH INTERESTS:

My interests lie in algorithmic mechanism design and approximation, in particular, in *mechanism design for social good*, including (1) developing to the theoretical foundations of this area and (2) addressing domain-specific questions in this area, e.g. within health insurance and carbon markets. In addition, I am interested in core challenges in algorithmic mechanism design, e.g., within (3) foundational revenue maximization problems beyond single-parameter and (4) designing simple and robust yet approximately-optimal mechanisms.
